Clark undertook to throw the wagon into the bank but the brake failed to work, and instead the vehicle ran over the back. Two wagons respectively driven by Dave Dumas and John Lay, of Oak Creek, were behind him and very soon appeared upon the scene. ## TONSILS OF NO USE

From Chicago, whence comes the latest in science, art, religion, medicine and general knowledge, arrives the dictum that the tonsil must follow the appendix. The Chicago board of health has said so. It has discovered Dr. Alice Neville Vowe Johnson, of Lambeth, London, who has pronounced the tonsil the enemy of mankind. Upon this authority the board of health has hastened to issue a bulletin declaring the tonsil to be "the nursery and bothouse for the propagation of every form of evil microbe from that which causes quinsy sore throat, to the malignant staphylococci, streptococci, pneumococci and lepto-thrix, which causes diphtheria, pneumonia, tuberculosis, gangrene of the lungs, inflammation of the heart membranes, and a few other fatal maladies. It is said to be the commonest cause of mouth breathing and mental dullness among children."

Dr. Johnson has already excised the tonsils of a hundred or more Lambeth schoolgirls in pursuance of her theory, and the Chicago board of health hates to see anybody get that far ahead of it. It has hopes that it will some day be able to collect enough ideas—from other people—to excise appendices, tonsils and all the other microbe collecting organs in the human body, and present the world with an official course in operation and excisions which will guarantee the victim immunity from any and all diseases whatsoever.

Unfortunately this laudable ambition may be foiled by the more or less important fact that there will be nothing left of the human body when the course is completed.

WANTED—I will furnish development money for a half interest in a good prospect. Describe fully and correctly. A. Harvey, care of Journal-Miner. 11-1w-d&w
